School Re-opens On Tuesday

School re-opened in Carbon on Tuesday of this week and the first term of the current year was under way. Congestion in the main school building has been relieved by the moving into Carbon of the Mosher school. The new room will accommodate Grades 3 and 4 and has increased the teaching staff to five.

Mr. Jack Hughes has again been named principal of the Carbon school. Two new teachers, Mr. Jack Appleyard and Miss Anna Carlson, are on the staff. The roster is completed by Mrs. Olive Monroe and Mrs. Alberta Sherring, both of whom taught here last year. Classes and teachers of each follow:

Grades 1 and 2, Mrs. O. Monroe.
Grades 3 and 4, Miss A. Carlson.

Grades 5 and 6, Mrs. A. Sherring.

Grades 7, 8 and 9, Mr. J. Appleyard.

Grades 10, 11 and 12, Mr. J. Hughes.

Mrs. Bill Ross of Carbon is teaching at Gamble school this year.

Jack Barr, Chris Thumlert and Wilf Skerry of Carbon competed in the annual golf tournament at Drumheller Sunday and Monday of this week and brought home a couple of prizes in two events. Wilf Skerry won the second flight competition and Chris Thumlert placed second in the consolation event of the fourth flight. Jack Barr won his first round match in the third flight but lost in the semi-final and finished out of the jewelry.

LITTLE NEWS ITEMS OF LOCAL INTEREST

—Miss Grace Patton of Drumheller will again teach piano in the Carbon school and will be at the school on Saturday, September 9, from 10 a.m. to 5 p.m.

Mr. Alfred Braisher, son of Mr. and Mrs. W. A. Braisher of Carbon was recently promoted to the position of superintendent of the Calgary Power plant at Ghost River.

—The I.O.D.E. will sponsor another Square Dance in the Legion hall Saturday evening, September 9.

Among holiday weekend visitors at Edmonton were Mr. and Mrs. Bob Shaw and family, Don McLeod, Mr. and Mrs. Francis Poxon and son, Larry, Dale Poxon, Mr. and Mrs. Fred Bessant and Miss Lorraine Milligan. Lorraine remained at Edmonton and will attend school there.

ALUMINUM BARGE NEEDS NO PAINT

A metal barge which needs no paint has been built by an English firm. It is made of aluminum alloy which resists corrosion and weighs only 14 tons compared with the 30 tons of a steel barge of the same size. Its capacity on a three-foot draught is 90 tons compared with 75 tons. The barge can be exported in 60 prefabricated sections.

Pride In The Past

A VERY YOUNG COUNTRY looks to the future and has more concern with what lies ahead than with the past. Canadians travelling abroad are always impressed with the historic associations surrounding so many of the places of interest in the older lands, and are made to realize how new their own country is, in comparison. However, for a number of years there has been increasing interest here in marking historic sites and in preserving landmarks associated with great events or outstanding people of the past. It is well that interest has been taken in this matter before the significance of many of these places has been forgotten.

Is Essential To Nationhood

Some parts of the country are richer in historic associations than others, but there is no province which has not seen some great events connected with Canadian history, and which has not contributed outstanding citizens who have taken part in the building of the nation. There has been much discussion in recent years regarding the national consciousness of Canadians. Undoubtedly a knowledge of the country's history and pride in the struggles and achievements of the past, are important factors in the growth of a national spirit. The exploration and settlement of Canada, the early struggles for self government, the building of the railway systems and the many other events associated with the early times in this country have left succeeding generations of Canadians many historic places and events which are of lasting interest and importance.

To Preserve Folk-Lore

In addition to the preservation of historic sites, there is also a movement to preserve the folk-lore of early Canada. At present the main centre for the collection and arrangements of the songs and legends associated with the early times here is in the National Museum at Ottawa, and officials there regret that lack of funds so far have prevented the distribution of these works on a large scale throughout the country. The collection at the National Museum includes thousands of written records of myths, folk tales, sayings, games and dances. The chief curator, Dr. P. J. Alcock, has urged that the work of forming these collections should not be neglected. "It is from the older people that we get it," he has pointed out, "and the longer we leave it, the harder it is to obtain." In preserving places and folk-lore associated with the past, Canadians are doing a service not only to themselves, but to the future generations who will share our pride and interest in Canada's history.

Funny and Otherwise

A doctor, attending an old man, had instructed the butler in the art of taking his master's temperature.

One morning, on arriving at the house, the doctor ran into the butler.

"I hope," he said, "that your master's temperature is no higher?"

"I was just hoping that myself," said the butler, solemnly. "He died an hour ago."

"Ireland should be the richest country in the world."

"How is that?"

"Her capital has been Dublin for years and years."

One day an Irishman was asked to come to work an hour earlier than usual. This he promised to do. Next morning he was an hour late.

"Sure, sor, I would have been no good if Ol'd come, as I was fast asleep."

Sign in a bookstore in Scotland in July: Buy your gift books now so you may finish reading them by Christmas.

The small, slim man nervously stepped into the income tax office. He was doubtfully looking round when the inspector casually came up and asked:

"Yes, and what do you want?"

"Oh — er — nothing, nothing at all," replied the S.S. man. "I—I thought I would just like to see the—the folk I work for!"

Bob—Jane is like a furnace when it comes to practicing the piano.

Jim—You mean she gets all steamed up about it?

Bob—No. If you don't watch her, she'll go out.

Hubby: "I wonder why we never manage to save anything?"

Wife: "It's the neighbours; they're always doing something we can't afford."

Tenant — Why raise my rent when my room is in the attic?

Landlord—You use more stairs than any one else.

Exports To U.S. Reaches New Heights

OTTAWA.—Canada's exports to the United States reached new heights during July, the bureau of statistics reported.

Shipments totalled \$170,700,000, a jump of about 50 per cent. over the \$106,000,000 exported during July, 1949. Imports climbed slightly from \$160,300,000 to \$172,000,000.

Thus, Canada's traditional adverse balance of trade with the U.S.—cause of much of Canada's dollar worries—narrowed sharply from \$54,300,000 in July, 1949, to \$1,300,000.

The bureau's figures on foreign trade were preliminary. Final monthly figures will be issued in the next few days.

While Canada's exports to the United States increased, shipments to the United Kingdom declined and her favorable balance of trade with that country slipped.

Exports to the U.K. totalled \$35,300,000, down sharply from last year's \$71,100,000. Imports from Britain increased from \$29,400,000 to \$32,800,000. This made for a favorable balance of trade of \$2,500,000, compared with \$41,700,000 last year.

In total trade with all countries, Canada made shipments of \$256,700,000 during the month, up from last year's \$243,700,000. Imports swung up from \$230,900,000 to \$259,800,000.

There are four originals of the Magna Carta.

WAKE UP YOUR LIVER BILE—

Without Calomel—And You'll Jump Out of Bed in the Morning

The liver should pour out about 2 pints of bile juice into your digestive tract every day. If this bile is not flowing freely, your food may not digest. It may just decay in the digestive tract. Then gas blows up your stomach. You get constipated. You feel sour, sunk and the world looks punk.

It takes those mild, gentle Carter's Little Liver Pills to get these 2 pints of bile flowing freely to make you feel "up and up." Got a package today. Effective in making bile flow freely. Ask for Carter's Little Liver Pills, 35¢ at any drugstore.

Hunting Dates Set For Sask.

REGINA.—Southern Saskatchewan hunters will take to the fields and marshes in search of ducks and geese Monday, Oct. 2. Dates for this year's open seasons on waterfowl and upland game were announced in a bureau of publications release by E. L. Paynter, game commissioner for the department of natural resources.

They showed that sportsmen will have a full eight weeks with gun and dog on the hunt for ducks and geese. Seasons on both in the south end Nov. 25.

Monday, Sept. 25, will mark the opening of the game bird season in the northern areas and hunters there may open fire on ducks, geese and sharp-tailed grouse. Open season on other game birds, Hungarian partridge, ruffed grouse and ptarmigan, gets under way a week later.

The bag limit on ducks is eight per day and a hunter may have no more than 16 in his possession at any one time. The limit on geese is five per day and possession limit is ten. The season on both birds is the same. In the northern area, roughly that part of the province north of highway number five from Kamsack to Lloydminster, the season is open Sept. 25 to Nov. 18. South of highway five, the season is October 2 to Nov. 25.

The open season for sharp-tailed grouse, is Sept. 25 to Oct. 23 in regions two and three north of highway five. For the rest of the province, excluding the southwest corner, the season is open only three weeks—October 2 to 23. This latter season excludes region seven in the southwest, which roughly is bounded on the east by highway number four from the international border to Rosetown, and on the north by highway number seven from Rosetown to Alask.

The bag limit is five sharp-tailed grouse per day and possession limit is 10. In the northern area which has the longer season, bag limit is 20 for the season. South of highway five, excepting region seven, residents may shoot 10 or less sharp-tailed grouse but may bring their season's bag up to 20 if they travel north of highway five to do their shooting.

The regulations concerning sharp-tailed grouse are not to be confused with square-tailed or penated grouse, the true prairie chicken, upon which birds there is no open season.

The season on Hungarian partridge is October 2 to 9, inclusive, in the area south of a line roughly border-to-border through Prince Albert, again excluding region seven in the southeast. The northern boundary is traced out by the C.N.R. line from the Manitoba border to Tisdale, highway 35 from Tisdale to White Fox, and highway 55 from White Fox through Prince Albert and west to the Alberta border. The bag limit on Hungarian partridge is three per day and six for the season. Hunters can have no more than three in their possession at one time.

Regulations on ruffed grouse are similar to those on Hungarian partridge. The season is open the same time—October 2 to 9—while the bag limit is three per season and possession is three at one time. The area, however, includes a larger district in the north (region two), and excludes a greater portion of the south. The area excluded is that south of highways seven and 15 from the Alberta border to Raymore and west of highways 35, 22 and six from the international border to Raymore.

The season on ptarmigan extends from Oct. 1 to Jan. 31, 1951, and applies to the whole of the province frequented by the birds. Bag limit is 10 per day and 30 for the season. A hunter is allowed to have no more than 10 birds in his possession at one time.

An additional regulation requires that all hunting shotguns in the province be plugged so that maga-

New Plant To Handle Manitoba's Wild Rice Crop

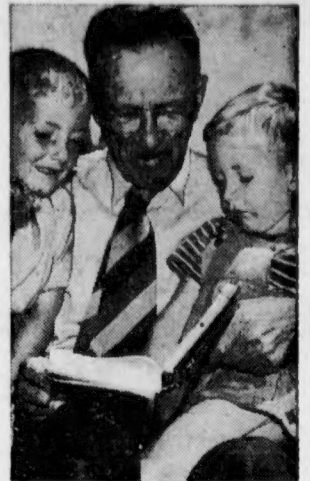

WINNIPEG.—Resources Minister J. S. McDiarmid said Canada's first wild-rice processing and packaging plant is under construction at Lac du Bonnet, Man. It will be ready to handle this year's crop.

Manitoba wild rice is considered the best on the continent. In the past it has found a large market in the United States but has always been sold unprocessed.

The plant, involving a capital investment of about \$25,000, is privately-owned. It will handle about 200,000 pounds of rice a season.

In the normal person, one inch of height should add two pounds of weight.

zine cannot carry more than two shells between Sept. 1 and Nov. 30. Licence fees remain at \$2 for residents and \$10 for Canadians not residing in Saskatchewan. Fees for aliens is \$25.

—Central Press Canadian.
ONTARIO MINISTER ON 72nd BIRTHDAY—Hon. T. L. Kennedy, Ontario minister of agriculture, spends his 72nd birthday on his Dixie farm with his grandchildren. He has been in public life for 50 years, was premier after Mr. Drew entered federal politics.

Flaky COFFEE CAKES

● These toothsome Flaky Coffee Cakes are a sample of the superb results you get with new Fleischmann's Royal Fast Rising Dry Yeast! No more anxiety about yeast cakes that stale and weaken! Fleischmann's new Dry Yeast keeps full strength, fast-acting without refrigeration—get a month's supply!

FLAKY COFFEE CAKES

● Scald 2/3 c. cream, 2 tbs. granulated sugar, 1 tsp. salt and 3/4 c. shortening; cool to lukewarm. Meanwhile, measure into a large bowl 1 1/2 c. lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle with 1 envelope Fleischmann's Royal Fast Rising Dry Yeast. Let stand 10 mins. THEN stir well.

Add cooled cream mixture and stir in 3 well-beaten eggs. Stir in 2 c. once-sifted bread flour; beat until smooth. Work in 2 1/2 c. (about) once-sifted bread flour. Knead on lightly-floured board until smooth and elastic. Place in greased bowl and grease top of dough. Cover and set in a warm place, free from draught. Let rise until doubled in bulk. Mix 3/4 c. granulated sugar and 2 tps. ground cinnamon; sprinkle half of this mixture on baking board. Divide dough into 2 equal portions and turn out one portion onto prepared board. Roll out into a 12" square; fold from back to front and from one side to the other. Repeat rolling and folding 3 more times, flouring board lightly if it becomes sticky. Seal edges of folded dough and place in a greased 8" square cake pan and pat out to fit the pan; butter top lightly and press walnut halves well into the dough. Sprinkle remaining sugar and cinnamon mixture on board and treat second portion of dough same as first portion. Cover and let rise until doubled in bulk. Bake in a moderate oven, 350°, 15 mins., while preparing the following syrup; simmer together for 5 mins., 1 c. granulated sugar, 1 1/2 tps. grated orange rind, 1/4 c. butter or margarine and 1/2 c. orange juice. Quickly pour hot syrup over the 2 partially-baked cakes and bake cakes about 15 mins. longer. Stand baked cakes on cake coolers for 20 minutes, then loosen edges and gently shake from pans.

SO NERVOUS, RESTLESS SEVERAL DAYS BEFORE

Your MONTHLY Period?

Do female functional monthly ailments make you feel so nervous, strangely restless, so tense and weak a few days just before your period? Then start taking Lydia E. Pinkham's Vegetable Compound to relieve such symptoms! It has such a soothing, comforting antispasmodic effect on one of woman's most important organs, working through the sympathetic nervous system.

Pinkham's Compound does more than relieve monthly pain. It also relieves pre-period nervous irritability, tense emotions—of this

nature. Regular use of this great medicine helps build up resistance against such female distress. Truly the woman's friend!

NOTE: Or you may prefer Lydia E. Pinkham's TABLETS with added iron.

Woman Lawyer Asks Revival Of Marriage Contract Custom

NEW YORK.—Muriel Richter would be glad if brides would revive the old custom of drawing a marriage contract. "They used to do it in the times of the Stuarts and the Bourbons," said the lawyer, divorce lawyer, "and I'd like people to do something like that now. Not in case of a future law suit, but just so they would know what to expect out of marriage."

Miss Richter, who is a wife, mother and chairman of the Domestic Relations Clinic of the National Association of Women Lawyers, thinks the time to learn the business end of marriage is when a couple is wildly in love and determined to wed. Their thinking then is pretty flexible.

Except in cases where there is a religious problem, Miss Richter says, the two important people to consult before the ceremony are a physician—"there are doctors particularly skilled in giving marital advice"—and a lawyer.

"I think we've got away from thinking of the family lawyer as a family confidante, skilled in handling people and getting to the root of troubles," she says. "A good lawyer talking to a couple in love could solve a lot of potential divorce problems before they even got started."

Before marriage, the starry-eyed couple could absorb happily such information and advice—for instance—as to who would be responsible for the boy's or girl's debts if contracted before the knot-tying. They could talk over how the breadwinner or breadwinners would split their income.

"Let's say a fellow is making \$60 a week," she continued. "They could sit down and figure out how much they'd allow for rent, food, an insurance program, savings—all the rest of it, dug out of any one of a number of budget books. Then they'd decide—on the basis of percentages—what the wife's allowance would be."

"I'd hate to count the number of marriages I've seen that started out with the wife saying she didn't need an allowance because her husband gave her anything she asked for. When the bloom is off the peach, sometimes it's harder and harder to get a little spending money. This is definitely a cause of serious friction."

Miss Richter thinks that such a little pre-marriage talk would not only familiarize the couple with their financial assets and liabilities, but would almost force the husband to be honest about his income.

Cleanliness Clue To Good Food In Cafes

OTTAWA.—When "eating out," pick a clean-looking restaurant to begin with and chances are you'll find the food will be good and carefully prepared.

Health department experts warn that the germs which cause food poisoning, dysentery and typhoid are invisible. But their presence can usually be determined by certain danger signals given by the premises itself; the equipment and utensils used; the way the food is prepared and served; the appearance and habits of the staff.

There should be no flies buzzing about; no chipped plates or cups or greasy dishes.

The good waitress does not handle the inside of glasses nor invert a glass over the bottle thus contaminating the rim.

The customer is served with a pair of spotless hands which pick up knives and forks by their handles, lift ice with a scoop or spoon and butter with a fork.

The customer can assume his responsibility and protect his health by patronizing safe eating places and by reporting infractions of sanitary regulations to his local health authority.

YOU'RE TELLING ME

By WILLIAM RITT

Central Press Canadian Writer

The man at the next desk says that folks who sleep like logs often sound like a saw is cutting right through 'em.

Zadok Dumkopf says it's one of the paradoxes of our times that it's the new Papa (who can least afford it) who passes out the free cigars.

One Canadian town, pestered with starlings, acquired an owl to chase them away but the wise one up and disappeared. Apparently, it, too, was fed up with starlings.

A Parisian was fined for biting a neighbor's dog. Who got the dough—the dog?

What Junior fears is that one of these days Hopalong Cassidy is going to find out he can catch crooks quicker with a car.

Florence Chadwick, the gal who set the English channel swim record, was once an office secretary. Apparently, she's found crossing channels as easy as doing same to Ts.

A Michigan man was jailed 30 days for hoarding. What he was hoarding was 13 police traffic violation tickets.

"Cigarette Prices Jump"—headline. Just more of our spending money going up in smoke?

A girl sporting the new hour-glass waist is in keeping with Time as well as the times.

Shorter Women Getting Attention From Designers

NEW YORK.—She used to be the forgotten woman in the clothing trade—the half-pint of five-foot-five or less—but nowadays she's getting more of a break. The reason: discovery that she is really the average American woman.

Almost two-thirds of American women belong in this group, says the U.S. Department of Agriculture, setting the average height a little over five-foot-three. A mere one per cent. are the willowy five-foot-nine type for which Paris creations are designed, and the in-between group numbers 33 per cent.

Further, the statistics show that a goodly proportion of these half-pints are well-rounded, the type that must choose cloths carefully to avoid a dumpy appearance.

A small but growing segment of the clothing industry holds that these average women should have dresses and suits styled and scaled to their measurements, instead of altered hand-me-downs designed for their taller sisters.

JAPANESE SHIPS TO CALL AT U.S. PORTS

WASHINGTON.—Japanese merchant vessels shortly will start calling at United States ports for the first time since 1941, the army announced. The army said that the government had granted clearance for Japanese sea-born trade to and from American ports but that initially only tramp vessels engaged in bulk cargo-carrying will take part.

To Ride Tricycle 3,000 Miles

MELBOURNE, Australia.—Dressed in a pair of swim-trunks, a hat, and a pair of shoes, 63-year-old Roy Smith is hoping to ride a tricycle 3,000 miles to Cairns, Queensland. Smith already has ridden to Brisbane on his tricycle, but said he pushed the bike up the hills.

"I think I probably will walk about 2,000 miles on this trip because of all those hills on the way. Still, I think the tour will take me only four months," he said.

Smith has been fighting for dress reform for 16 years, and said he wears trunks when cycling because "it is much cooler."

Car Bumper Not Good Place To Leave Handbag

WINDSOR, Ont.—An absent-minded Chicago tourist hung up her purse in a downtown street and police had to chase half over town to recover it and the \$100 it contained.

Mrs. Fred Casey, loading articles into the trunk of her car, found her purse cumbersome and hung it on the bumper of a car parked behind. The car behind started away and had gone half a block before Mrs. Casey noticed her loss. Police took up the chase.

The trail grew warm when a pedestrian stopped the police cruiser and said some automobile must have hit a woman—a purse was hanging from its bumper.

The surprised motorist, who didn't know his car had stolen \$100, was stopped several blocks later and the purse was returned to Mrs. Casey.

Window displays influence 50 per cent. of purchasers, who had no intention of buying.

TESTING THE TEMPERATURE

HOW COLD IS IT?

TAKEN ASSISTANCE

HOPE OF HEIL

Englishwoman Longs To Stay In Canada

MONTREAL.—As she saw her family off to Canada from England 28 years ago, Florence Hutton promised she would save her money and come to see them some day.

She has arrived at her family's home here but she hasn't seen them. She never will.

For Miss Hutton—now 60—who flew from her home at Coventry, England, for a visit, is totally blind. Despite her handicap, she moves around her 90-year-old mother's small suburban home with confidence. She knits, sews and crochets.

The plucky Briton is unhappy about one thing only. She is allowed but three months in Canada. Immigration regulations concerning handicapped persons allow her no more time.

"That was the immigration department's stipulation, and I shall abide by it," said Miss Hutton. "But I did so want to make my home here with my mother and sister. I thought we could end our days here together."

Besides her widowed mother and sister with whom she is staying, Miss Hutton has a brother living here. Another brother lives at Summerland, B.C., and a sister at Calgary. Two brothers and sisters remain in England.

After trying for three years to make the trip to Canada, permission was finally granted by immigration authorities on the understanding she would ask no extension of the three-month-limit.

Miss Hutton said her sight was poor throughout her life, but she worked 25 years as an expert masseuse with the British Ministry of Pensions. Five years ago she became sightless and had to give up her work.

Cuts \$19 Million Estate To \$2 Million

NEWPORT, R.I.—Suppose you inherited a \$19,000,000 estate? You might get \$2,808,615.33.

Newport probate court probated the \$19,569,316.04 estate of Robert Walton Geole, an oil and real estate magnate who died in 1941.

Deductions listed by the estate executors totaled \$16,770,700.71. These included Province of Quebec tax, \$6,833.74; Province of New Brunswick tax, \$7,893.21, and U.S. Federal taxes, \$11,572,448.60, as well as several state tax deductions and administrative expenses.

MIGHT BE EITHER ONE

"I get wonderful recipes over the radio," gushed the bride, who was entertaining her family for the first time. "I got one for Egyptian stew and one for a never-fail stain remover this morning."

"Which is this?" asked little Willie, tasting the stew with which he had just been served.

On The Side : - By - E. V. Durling

In New York bottled rain water is now being sold for \$1.50 a bottle. The bottles are very fancy. The rain water is used by females for hair washing. It is claimed to be the best water for that purpose. Of course, that has been known for a long time. Your great-grandmother probably used rain water to wash her hair. But she didn't put out a buck and a half for a bottle of it. She put a barrel out in the yard when it rained and saved the water.

INSISTENT SLEUTH

A woman reported some jewellery had been stolen from her handbag. When a detective arrived to investigate he asked if he could look through the lady's handbag. She was indignant. "Why, I have looked through it five times," said she. Nevertheless, the sleuth insisted on having a look. After a long search he found the allegedly missing jewellery in the bag buried under a large number of miscellaneous articles.

BATTLE OF THE BULGE

Have you, mister, that type of bulge in the midriff facetiously referred to as "a corporation"? Do you wear a belt or suspenders? It is claimed when a man wears a belt he unconsciously pushes his stomach forward to hold his trousers up. This, it is said, is a factor in bringing on the type of aforementioned bulge.

RECORD THE EVIDENCE

A motorist informs me he carries a recording device in his automobile. Object—to record any conversation he may have with a traffic cop so he cannot be unjustly accused of having been abusive to the officer. Or in the event the officer is arrogant, abusive and unreasonable.

UNFORTUNATE TURTLE

Now a turtle has been psychoanalyzed. This turtle named Super Diamond is owned by a Washington, D.C., resident. Super Diamond has two heads. The psychoanalyst revealed that these two heads do not get along with each other. They try to steal food from each other. Also, one head sleeps while the other stays awake. While one head is asleep the turtle cannot move no matter how much awake his other head is.

HORSES HAVEN

Lady Yule, the richest widow in Britain, died recently. She left her fortune, estimated at \$20,000,000, to her daughter, Gladys. This makes Gladys the richest spinster in Britain. She is 46 years old. Gladys, as was her mother, is greatly interested in animals. She has 50 cats, 100 or more dogs and innumerable horses. It was the practice of Lady Yule to have representatives everywhere in Britain to buy old horses. These horses were brought to the Yule estate and permitted to live out their lives in the green pastures in ease and peace.

WHY NOT MEN?

The number of partially bald men is truly great. Look around any place where a group of men, in their middle thirties and forties, are assembled and you will be astonished to see how many are shy on hair. This lack of hair ages a man's appearance. More men should go in for the use of hair pieces. Some remarkable results are now possible in concealing baldness. If a man's wife uses every artificial aid available to make herself look 10, 15 or even 20 years younger than she really is why shouldn't he do likewise? A young appearance is a business asset. Also looking young has a tendency to keep a man thinking young.

World Happenings Briefly Told

Canada produced a record 1,689,024 tons of steel during the first six months this year, the bureau of statistics reported.

The Pakistan Government has prohibited the export of domestically-produced sporting goods without "made in Pakistan" marked indelibly on the goods.

British automobile manufacturers turned out 100,000 more cars in the first six months of this year than the same period last year—its a record year.

Canada boosted her copper output during the first six months of this year, the bureau of statistics reported, but nickel production dropped more than 6,000 tons.

A native woman, giving evidence in an assault case, at Port Elizabeth, South Africa, was asked by the prosecutor if she believed in witchcraft. "I am a witch," she replied.

West Berlin authorities drained a pond in children's playground and found one 500-pound bomb, 50 incendiary bombs, five tank grenades, two 12-centimetre grenades and some small arms ammunition.

R. H. Cooper, Saskatoon, has been appointed instructor in animal husbandry at the Olds school of agriculture, Hon. David Ure, Alberta minister of agriculture announced.

American babies are helping Bri-Polio myelitis is comparatively scarce in Canada this year. Health authorities don't know why, except that the crippling paralysis of polio comes in cycles and this apparently is an off-year.

A 17-year-old London taxicab has crossed the Simplon Pass, Switzerland, at a height of 6,595 feet. Driven by four Cambridge university students on a 3,000-mile tour of Europe, the taxi covered the entire distance without requiring any additional oil.

Fashions Essential For Fall

4651
SIZES
12-20; 40

Anne Adams

Such a beauty! Smart to sew this classic twice! In cotton with short sleeves, in wool with three-quarter sleeves and a tiny detachable collar in bright color. Either way it's a neat trim flatterer!

Pattern 4651: sizes 12, 14, 16, 18, 20; 40. Size 16, 3 1/2 yds. 39-in.

This pattern, easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send twenty-five cents (25c) in coins (stamps cannot be accepted) for this pattern. Write plainly size, Name, Address and Style Number and send orders to:

Anne Adams Pattern Dept.,
Winnipeg Newspaper Union,
60 Front Street W., Toronto.

NEW TWISTS

The annual lumberjack contests at Kuhmo, Finland, had some new twists. Competitions included walking across a 100-foot-wide river on a swaying cable and shooting rapids on a log.

Agriculture Headquarters

(Canada Department of Agriculture Photo by NFB.)

Reminiscent of a giant's castle, the Confederation Building in Ottawa, headquarters for the Canada Department of Agriculture, contains the offices of the Minister, Deputy Minister, administrative staffs and staffs of the marketing, production and information services of the department. Situated on Wellington street at the north end of Bank street, the structure is close to the Parliament Buildings and commands an impressive view of the Capital, the Ottawa river, Gatineau Park and the Laurentian foothills in Quebec.

PRODUCTION FALLS

Ice cream must be losing its popularity. The bureau of statistics reported production of the frozen sweet in the first seven months of the year fell more than 1,000,000 pounds—from 15,438,000 in 1949 to 14,097,000.

GIVEN VACATION

About 1,500 Norwegian housewives were given two-week vacations at mountain resorts at the expense of the Norwegian Trade Union Holiday Association.

The average housewife washes six tons of dishes a year.

European Championships, 1950—Britain v. Iceland. In Room 1 the British East opened One Club, West bid One Diamond and North One Spade. This was passed round to West who made the strong call of Two No-Trumps, but East showed good judgment in passing. North led ♠Q and West could only make 7 tricks.

At the second table East opened with a conventional One Club and West made the forcing - to - game response of One No-Trump. North bid Two Spades, East and South passed, and West was compelled by his system to play the hand in Three No-Trumps, going three down after trying for a miracle. Iceland, it is true, had no luck on this hand when the Diamonds failed to break, but the more rational British bidding earned 3 match points.

WEEK-END BRUNCH MENU

If you like to serve lunch and breakfast together on a weekend day, fruit, broiled ham slice with scrambled eggs, coffee cake and coffee make a satisfying menu.

★ ★ ★ ★

★ ★ ★ ★

NEW ONTARIO MINISTERS SWORN IN—New minister of health for Ontario, Hon. Dr. Mackinnon Phillips of Owen Sound is sworn in. Premier Leslie Frost, left, and Lieut.-Gov. Ray Lawson, right, witness his signature at ceremony in Queen's Park.—Central Press Canadian.

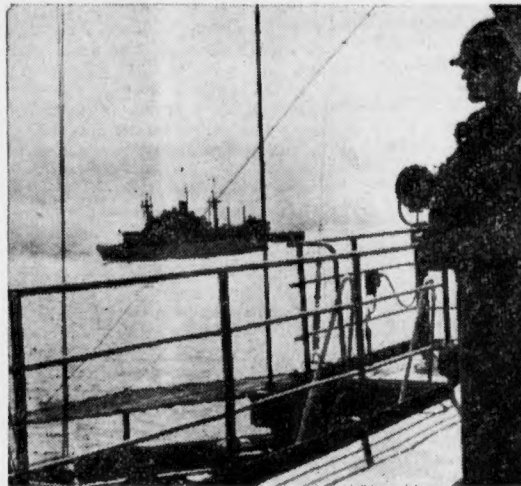

COMMISSION DU PONT TO DEVELOP H-BOMB—The U.S. joint congressional atomic energy committee has confirmed reports that the atomic energy commission's tentative contract with the Du Pont Corporation is for development of the hydrogen bomb. The announcement was made after an executive meeting of the Senate-House group with Crawford Greenwalt, president of Du Pont. Shown left to right: A.E.C. Chairman Gordon Dean; Crawford Greenwalt, president of Du Pont Corp., and Senator McMahon, chairman of the joint atomic energy committee.—Central Press Canadian.

2,000 FEET AWAY FROM ATOM EXPLOSION—Further information on the effect of atom-bombing has been released by U.S. authorities by the publication of such photos as this, taken after the planned explosion at Bikini. This is the deck of the U.S.S. Nevada after the bomb had exploded 2,000 feet away. Shock waves from the explosion, it was found, severely damaged superstructure of ships 3,000 feet away.—Central Press Canadian.

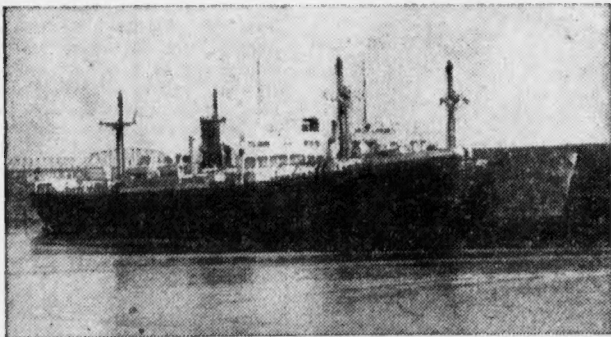

BELGIUM GIVES PLANE TO AIRLIFT—Belgium's commercial airline contribution to the United Nations airlift to Korea arrives at New York complete with two civilian crews. The Brussels government assigned this DC-4 to the much-needed air run across the Pacific which is operated by a combination of commercial airlines of United Nations member countries.—Central Press Canadian.

SHELL COAST UNDER SMOKE SCREEN—A smoke screen is laid down by destroyers shelling the Korean coastline to shield them from fire from heavy tanks. British and U.S. naval forces patrolling the East Korean coast have halted many south-bound Communist convoys.—Central Press Canadian.

HE DISCUSSED NAVAL AFFAIRS, TOO—On his flying visit to Formosa, General MacArthur conversed with Nationalist naval men as well as army leaders. Here, his words seem to inspire cheer in Admiral Kivel Yun-tsen, left, and General Chou Chih-jou.—Central Press Canadian.

TO KOREA—Two former Canadian government freighters—the Fort Colville and the Fort Wayne—shown above in Montreal, will go into the Korean battle as supply ships soon. The Fort Colville left Montreal recently to load at a U.S. port en route to the west coast for service which may take her to Korea. The Fort Wayne, purchased from the government by a private firm—as was the Fort Colville—will move into drydock for a 30-day period and is then slated for Korean services.

HUNGARIAN CATHOLIC PRIESTS CRITICIZE VATICAN—At a conference of progressive Catholic priests of Hungary, in the University of Budapest, more than 300 Catholic priests signified they wanted an understanding between the Hungarian state and the Catholic church as soon as possible. They sharply criticized the policy of the Vatican towards the Hungarian Peoples Republic, and joined in the Stockholm Peace resolution. This is a scene from the conference with Jozsef Darvas, minister for education, at the microphone.—Central Press Canadian.

PRIZE OF BATTLE TAKEN FOR QUESTIONING—A stoical North Korean is driven back from the battle lines by grinning U.S. soldiers who captured him near Chinju. The Korean, told by his superiors that Americans kill their prisoners is probably resigned to death.—Central Press Canadian.

VILLAGE CAPTURED, SNIPERS STILL REMAIN—While infantrymen gaze over a stone wall, on the lookout for any enemy stragglers still in the vicinity, a tank-dozer is shown advancing down the street of this unidentified village taken from the Communist invaders of South Korea.—Central Press Canadian.

Russian Power In Baltic Makes Pincer Thrust Possible

By JOHN F. SEMBOWER
(CPC Correspondent)

WASHINGTON.—It is a long way from Korea, but since the Russians sit astride the top of the world and play an artful game of global divergencies, western military strategists are keeping a close weather eye on the Baltic sea.

They speculate that it is more than an even chance that the next Red move in the world-wide chess game of war may be to attempt what Hitler almost but not quite accomplished—make the Baltic a private lake.

In fact, the most dramatic Soviet offensive and defensive manoeuvres in the last 18 months have not been in Red China or even Korea, but in the area where they have built the post-world war II version of France's Maginot Line and Germany's West Wall before the last war.

The most reliable reports received here indicate that from Hamburg to Leningrad stretches an unbroken array of Red submarine pens, forts, radar installations and naval bases.

They have mobilized in the most modern ways of present-day warfare the historical strong points of czarist Russia in the region, and added the traditional German Baltic strongholds of Koenigsberg, Stettin, Rostock and Stralsund. Estonia has become the scene of extensive war games both summer and winter.

Most of the iron curtain is a flimsy screen compared with the blanket of secrecy that the Reds have draped over the entire region. Along this vital coastline no civilian may approach within five miles of the sea, and Stalin has extended the usual three or four mile territorial limit at sea to a self-appropriated 12 miles.

It was into this mesh of secrecy and intrigue that the United States plane, which was shot down last spring, flew. Recently fishing vessels of neutral Sweden have been disappearing with a regularity which has brought a sharp but so far futile protest from the Swedish government.

This also is the area from which an estimated 800,000 to 1,000,000 Lithuanian Roman Catholics are reported to have been deported to Siberia, according to the sharply worded protest of the Vatican.

There is mounting suspicion on the part of the most careful observers here of this grim drama that if Russia moves to oust her former allies from occupied Germany it will be a gigantic pincer action around the Baltic sea.

Russian forces may surge southward through Norway from Murmansk—the port through which the United States and Britain funneled so much war material to help Stalin stave off Hitler's attempted conquest.

Simultaneously other Russian forces may move to the Atlantic coastal areas through Denmark and the low countries. The first tipoff might well be the sudden seizure of the Danish island of Bornholm, which stands like a cork in the sea bottleneck to this new "Russian lake".

Occupying an uneasy ringside seat for all these menacing developments is Sweden, peaceful for 135 years. Unwilling to join its neighbors Norway and Denmark in the family of Atlantic pact nations, the Swedes have elected to go it alone and are

making efforts to strengthen themselves militarily.

Plucky though these moves may be, they are viewed here as pitifully inadequate to contain any Russian thrust. The current Swedish military calling for 1,075,000 kroner a year (a little more than \$2,000,000 in United States money) will be hiked to 1,300,000,000 kroner—a mere drop in the bucket.

The Swedish navy has contracted for the building of two new destroyers at the considerable sum, for Sweden, of \$16,000,000 each. This is to be compared, however, with Russia's estimated naval strength in the area of 110 vessels, including eight cruisers and the old czarist battlewagon, now named the October Revolution.

Focal point of Russia's rocket development is in Pomerania on the north German coast, where Hitler's scientists did their explorations which resulted in the first practical projectiles of this type.

However, the key to Russian intentions in the Baltic undoubtedly are its submarines, considered to be the Reds' most potent striking arm at this moment together with their masses of land troops and capable artillery.

With the entire Baltic sea as a spawning ground for undersea craft, Russia may aim to make the U-boat depredations of the Kaiser and Hitler seem tame by comparison. This is one big reason why the spotlight of the stop-Russia strategy is quite as much on the Baltic these days as on Korea, where western U.N. and Soviet arms already are clashing.

Helpful Hints

Lightning rods won't protect your buildings unless all connections and ground wires are in good order, according to University of Illinois engineers.

If a little paint splatters on a piece of furniture, apply a few drops of machine oil to the spots and rub them in lightly with a finishing paper.

Overbeating makes for curdling, so when you are preparing whipped cream beat it only until it holds its shape. You will need four tablespoons of sugar to sweeten a cup of the cream; beat the cream until it thickens, then add the sugar slowly along with a little vanilla.

If those decorative candles on your mantel tend to wilt in the heat, why not apply a thin coat of shellac to their surface? Keeps them firm and upright in even the warmest weather, and the invisible coating keeps the "how" of your secret.

Smile Of The Week

"Say, what's the best way to teach a girl to swim?"
"That's a cinch. First you put your left arm under her waist and you gently take her left hand and . . ."
"But this girl's my sister."
"Aw, push her off the dock."

A little learning is a dangerous

The Nobel prizes were established by the Swedish scientist, Alfred Nobel, the inventor of dynamite, who died Dec. 10, 1896.

The first organized hospital for the blind was established in Paris in 1260 for soldiers who had lost their sight.

The oldest scientific instrument is believed to be the astrolabe, used by the Greeks 2,000 years ago, for telling time and latitude.

Cellulose sponges, made from specially treated wood pulp, will absorb 20 times their dry weight and still float.

The Moors who settled on the Rock of Gibraltar in 711 named it "The Mountain of Tarik" after their chief.

The cubit, ancient measure of distance, was actually the length of a man's forearm from elbow to the end of the middle finger.

While they do not always produce colds, draughts often sap the vitality, particularly of infants, the aged and sickly. Medical experts, therefore, say dodge the draughts.

A carnival which toured England in the middle of the 18th century exhibited a man eight feet tall who could snap six-inch posts across his knee.

Jade colors vary from deep green or black to pure milk white or cream tinted, with rarer finds of yellow, red, mauve, and mottled.

The custom of cutting the hair first appeared at the end of the fourth century. It was a symbol of self-dedication to the monastic life.

The Chinese know the Christmas festival as Cheng Dan Jieh—the Holy Birth festival. Their Christmas tree is called "Tree of Light".

The waters of Lake Superior, Lake Michigan, Lake Huron, and Lake Erie rush into Niagara's Whirlpool Rapids at the rate of 1,500,000 gallons a second.

Among the famous historical personages whose locks of hair are included in a university collection are Napoleon, George Washington, Edgar Allan Poe and John Milton.

BRITISH ADMIRAL HAS BEEN RETIRED

LONDON.—Vice-Admiral Charles H. L. Woodhouse, British naval hero, is now on the retired list. He was in command of the cruiser Ajax which with two other British men-of-war defeated the German pocket battleship Admiral Graf Spee in the battle of the River Plate, Uruguay, in December, 1939. He was a captain at the time.

For The Farmer

Hogs Fed Right Minerals Show Remarkable Results

Hogs fed the right minerals, in addition to their ordinary rations, show remarkable increase both in daily gains in weight and in economy of pork production. In an experiment conducted at Agassiz Experimental Farm, pigs that did not receive any mineral supplement made an average daily gain of 0.70 pounds and consumed 615 pounds of feed per 100 pounds live weight gain.

Pigs receiving a mineral mixture made an average daily gain of 1.10 pounds and consumed 420 pounds feed per 100 pounds gain.

In another experiment conducted at the farm, pigs that did not receive any fish oil made an average daily gain of 1.11 pounds and consumed 385 pounds feed per 100 pounds live weight gain.

Pigs receiving cod liver oil made an average daily gain of 1.41 pounds and consumed 363 pounds feed per 100 pounds gain.

Pigs receiving pilchard liver oil made an average daily gain of 1.44 pounds and consumed 360 pounds feed per 100 pounds gain.

Commenting on these experiments, Roy Giles, animal specialist at the Agassiz farm, says that "vitamins and minerals are essential for normal growth and reproduction and that they must be supplied in proper quantities in the hog ration, especially because hogs make a more rapid growth than other farm animals."

Grains and grain by-products are low in mineral and vitamin content. Green feed and pasture are good sources of minerals and vitamins.

Swine on pasture will not require mineral and vitamin supplements to

the same extent as swine on dry lots.

Minerals of concern to the practical swine feeder are calcium, iron, iodine, common salt, and sometimes phosphorus.

Vitamins requiring consideration are vitamins A and D, and sometimes certain members of the vitamin B-complex group.

The pregnant sow requires supplements of iodized salt and ground limestone in equal quantities, each increasing from 0.5 per cent. of the ration during the first half of pregnancy to 0.75 per cent. during the second half of pregnancy.

If no good quality, sun cured legume hay is provided in racks to supply the vitamin A and D requirements, each sow should receive a half-ounce of 1200A-200D each day.

The lactating sow requires the same supplements as during pregnancy except that in the latter supplement the half-ounce may be increased to three-quarters.

Suckling pigs may be supplied with iron by placing sods in the pens daily or by dosing each pig three times at weekly intervals with a small amount of reduced iron or powdered ferrous sulphate.

Growing and fattening pigs require equal quantities of ground limestone and iodized salt, each fed at the rate of about 0.75 per cent. of the ration up to the time the pigs reach 125 pounds live weight, and subsequently reduced to 0.50 per cent. between 125 pounds and marketing.

Two Years After Babe Ruth's Death

VALHALLA, N.Y.—It is green and quiet and peaceful in Gate of Heaven cemetery and somehow, two years after Babe Ruth's death, there is a feeling that a forgiving Bambino finally is at rest.

The Babe, with his legendary career behind him, was a bitter and disappointed man.

The Babe's big dream as he came to the end of his playing days was to manage the Yankees. But the Yankees never gave him that chance.

That refusal was a millstone around his neck as the years marched past. And it still was there, later, as the flesh weakened and the Babe played his last few innings.

But now you look at the monument in Gate of Heaven Cemetery and read the inscription:

"May the Divine Spirit that animated Babe Ruth to win the crucial game of life inspire the youth of America."

The Babe must know, somehow, that he's still the manager for an awful lot of kids. And you know that the Babe isn't bitter any more.

HERE'S HEALTH

The man of sagacity
Who aims to keep fit
Won't tax his capacity—
He'll know when to quit.

CROP INCREASE

Europe's 1950 wheat harvest (not including Russia or the Balkans) is privately estimated at 1,022,000,000 bushels, compared with last year's crop of 973,880,000 bushels.

How Red pincers could convert the Baltic into a Russian lake.

OUR COMPLETE SHORT STORY—

An Official Letter

Special Award For
Chris' Bravery.

By Samuel Campbell

THE address on the important-looking letter with the blue seal on the back read: "Captain Charles Christopher Stevenson, Tugboat — Trail Blazer, Pier No. 27."

Old Chris held the letter in one hand and with the other scratched a shaggy eyebrow and pushed his old weather-beaten hat far back on a balding pate. While he had been in the city making final arrangements about purchasing two new shiny life preservers and a set of chrome-plated letters which spelled "Trail Blazer", the mailman had shoved this letter under the window sill of the tugboat's small but spotlessly clean cabin.

"Charles Christopher Stevenson", he mused. It was so long since anyone had called him anything but Chris that he had almost forgotten he possessed the Charles and Stevenson.

"Aho! Don't hit any icebergs this afternoon, eh?" Chris shoved the letter deep into a pocket of his jacket, intending to open it later, and turned to see the owner of this gruff voice. He was walking spryly along the dock, and Chris recognized him as one of his cronies... one who had spent many a pleasant winter evening in the Trail Blazer's warm cabin playing checkers or just talking about the sea and listening to the wind.

But now the ice in the bay was floating out to the lake; the sun was glistening on the white wings of hovering gulls; spring was in the air and Chris' fingers were itching to hold the helm of his 25-year-old pride and joy and ease her out through the channel into the open waters of the Great Lakes.

"She looks mighty shipshape," said old Marty, appraising the captain's paint and window-cleaning job. "How'd yuh like a passenger on your first trip of the season?"

"Nopel!" replied Chris, firmly but friendly. "You oughta know I always take that first one alone. Kinda superstitious about that, I guess."

"Well, 'good sailin', Chris," and old Marty went about his own little business of boat repairs.

Just about noon, with black smoke belching from her newly painted funnel, the Trail Blazer cleared the quiet waters of the harbor and nosed out into the choppy white caps of Lake Ontario.

Aboard, Chris was captain, wheelman, stoker, cook and everything else it takes to run a tugboat. He was neither humiliated to tow a garbage scow nor pretentious about fetching a quarter million dollar yacht, the Silver Lark, from her winter quarters on the other side of the lake to her summer home at the yacht club.

This was the job he was out on now, and half way across the lake he began to wish he was safely back — tied up at pier 27.

The Trail Blazer had run into an unexpected squall of snow and freezing rain. Chris complimented himself for having had new windshield wipers installed. Otherwise he would never have been able to steer his course.

Suddenly there was a roar and a sputtering cough. Then the silhouette of a giant bird flopped down into the boiling waters just ahead of the tossing tugboat. Old Chris strained his eyes to see what he knew in his mind had already happened. He saw the wreckage floating to the starboard. A small silver Moth had plummeted into the lake and was sinking rapidly. Clinging desperately to the fuselage were a man and a woman, frantically calling for help.

Chris was old now, but once he had "sailed 'round the Cape" in a Clipper ship. His quick presence of mind as a seaman told him what to do.

He drew as close as he dared with his tugboat and threw the man a line and the two new life preservers. Dragging them through 25 feet of icy water, he soon had the couple wrapped in warm blankets and drinking hot coffee in his cabin.

"Johnson's my name, William H."

said the man, "Department of Marine Transport. This is my wife. We were flying to Buffalo for the weekend and got caught in the storm."

Johnson said a great deal more than this, of course. He talked all the ten-mile journey home. He even went as far as to say that he would personally see that Captain Christopher Stevenson was given a special award for his bravery in the rescue.

When they reached the Life Saving Station, Johnson and his wife waved good-bye to Chris, still smothering him with gratitude and praise. The last words he said were: "A fine, seaworthy tugboat, captain. The best afloat on the lakes."

Old Chris chugged over to pier No. 7 and tied up. He stood at the rail, feeling good inside, and shoved his hands deep into his pockets. He felt the letter, opened it and read: Captain Christopher Stevenson, Dear Sir:

It is with much regret that I have to inform you your tugboat, Trail Blazer, has been condemned by the harbor commission inspectors and deemed unseaworthy.

You will keep your boat tied up at pier No. 27 until further notice. Meantime, it is my duty to warn you that any voyages either in the bay or on the lakes, will constitute a serious menace not only to your own life but also to any passengers you may happen to carry.

Sincerely yours,
William H. Johnson,
Department of Marine Transport.

Brook Trout
From Alberta
In Sask. Waters

REGINA.—Anglers will be glad to know that eastern brook trout were planted this year at many points throughout Saskatchewan, according to a bureau of publications news release.

A. H. MacDonald, provincial supervisor of fisheries, announced that eastern brook trout fingerlings, procured from Alberta on an exchange basis, were recently stocked in 12 streams in the province.

He said two lots of fingerlings, totalling between 25,000 and 30,000, were transferred from Calgary to the Fort Qu'Appelle hatchery in the fisheries branch's live fish distribution unit. The first lot was transferred June 22, the second lot, July 11.

From the Fort Qu'Appelle hatchery the trout fingerlings were stocked in the following streams: Maple Creek, Dr. Hart's lake, Greenbush river, Overflow river, Prairie river, Battle Creek, Swift Current Creek, Connell Creek, Caribou Creek, White Gull Creek, Steward river and Cold river.

MANITOBA TO HAVE
NEW POST OFFICES

OTTAWA.—Federal postal officials have announced the establishment of three new post offices in northeastern Manitoba.

These are at Oxford House, God's Lake Narrows and God's Lake.

They will be served by the Winnipeg-God's Lake air stage service throughout the year, on a frequency of one round trip each month.

Personal PHOTO
CHRISTMAS CARDS

from your favorite snapshot
25 for \$1.25
plus the postage prepaid
including envelopes
This Christmas send photographic Yulecards, personalized from your own snapshot. They are so exclusively yours—beautiful—original— inexpensive. Send us a negative of your family, children, doorway, home or any other subject you like. We will make beautiful, distinguished cards of highest quality. You have choice of greetings and designs. See your cards before you buy. Send negative of your snapshot and a cent stamp for postage. We will return to you immediately free Christmas card, illustrated folder, and your negative. No obligation. This ad must accompany your order. Free offer expires Dec. 10.

YULECARDS, Box 220-A, Regina, Sask.

PEGGY

Duck Hunting

As time draws near for the sportsmen, who wait anxiously to invade small and large areas of water across the prairies in search of the mallard duck, the above scene will be a frequent delight, as it is reported that ducks are plentiful.

Western Briefs

New Brick Plant

ESTEVAN, Sask.—The Saskatchewan Government is building a new \$400,000 brick plant at Estevan. It is of the closed-in tunnel-kiln type, able to operate all year round.

Drop In Radio Licences

REGINA.—Rural radio licence sales were down compared with last year's figures according to a release from the Regina office of the district superintendent of radio. Sales were up in cities and towns, and there appeared to be no valid reason for the drop in rural sales, the release said.

To Complete Rink

SEDLLEY, Sask.—The village council of Sedley is authorized by the local government board to raise \$5,000, repayable in 10 years at three per cent., to finance the completion of a community memorial rink. Sedley is about 35 miles southeast of Regina.

Coach Of P.A. Mintos

SASKATOON.—Jimmy Wilson, former star in Saskatoon junior and senior hockey company, was named coach of Prince Albert Mintos of the Northern Junior hockey league. Wilson succeeds Don McCullough, the Moose Jaw man who piloted Mintos into the Saskatchewan final against Regina Pats last spring.

Pronounced First Vows

GRAVELBOURG, Sask.—Word has been received that Alain Piche, son of Mr. and Mrs. Conrad Piche, pronounced his first vows in the Order of the Oblate Fathers at the Oblate Novitiate, St. Norbert, Man. Paul Piche, son of Mr. and Mrs. D. D. Piche, Kelowna, B.C., made his entry the same day at the Novitiate.

Grade And Yield Down

WINNIPEG.—Frost damage to Manitoba grain will be reflected in both grade and yield in many areas, Manitoba pool elevators said in a weekly crop report. The report said full extent of the damage may not be known until fairly representative samples of all grains are available from the affected areas.

Soldier Commended
For Brave Conduct

EDMONTON.—Western army command announced 26-year-old Cpl. T. E. White of Verdun, Que., has been awarded the King's commendation for brave conduct in saving a man from drowning.

Cpl. White saved the life of H. Purvis who was caught in a whirlpool while swimming in Lake Athabasca in northern Alberta last summer. He found the unconscious swimmer after repeated dives and revived him on shore after 10 minutes of artificial respiration.

Most Dutch wooden sabots are made from poplar. 2897

Announce New
Lieut.-Governors

OTTAWA.—Prime Minister St. Laurent announced appointment of new lieutenant-governors for Prince Edward Island, Quebec and British Columbia, all effective Oct. 1.

Prince Edward Island: T. W. L. Prowse, Charlottetown.

The appointments:
Quebec: Hon. Gaspard Fauteux, former speaker of the house of commons.

British Columbia: Clarence Wallace, Vancouver.

INCREASED POPULATION

"In 1850, one hundred years ago, the number of people who lived in the world was one thousand and nine million. Today the number has increased to two thousand three hundred and sixteen million and is still increasing."—BBC Program.

Oil Leases
Net Alberta
\$8,370,524

EDMONTON.—Royalite Oil company of Calgary bought oil rights on four separate quarter-sections of land in the Redwater oilfield for more than \$5,000,000 to take the lion's share in the Alberta government lease sale.

Thirteen pieces of land in the Redwater and Leduc oilfields, totalling about 1,700 acres, were on the block and netted the government \$8,370,524.

No records were established for individual purchases. Royalite's top bid was \$1,727,100 for a quarter section (parcel 101) sandwiched between producing wells on the field's south-east fringe.

The total amount paid by Royalite, already a big producer in the Redwater field, was the largest ever paid by a single company at a government sale.

Other bids accepted for leases in and around the southeast section of the Redwater field were:

No. 98—\$502,000, Texaco Exploration Co.; No. 99—\$633,174, Dome Exploration (western) Ltd.; No. 100—\$927,174, Dome Exploration (western) Ltd.; No. 102—\$500,101, Pacific Petroleum Ltd.; No. 103—\$1,423,800, Royalite Oil Company Ltd.; No. 104—\$1,628,100, Royalite Oil Company Ltd.; No. 105—\$225,900, Royalite Oil Company Ltd.

In the Leduc field, two quarter sections adjoining recent discoveries in the southeastern corner known as parcels numbers five and six, both went to Texaco Exploration for \$226,000 each.

HOUSING CONFERENCE

OTTAWA.—Housing laws and how to make good use of them will be the theme of a two-day national conference to open here Oct. 6, Alan Armstrong, executive director of the Community Planning association of Canada, said.

Success Tip—
Bake it with MAGIC!

DATE-ORANGE PUDDING

Combine in a greased casserole (6-cup size) 1/2 c. corn syrup, 1 tbs. grated lemon rind and 1/2 c. orange juice. Mix and sift once, then sift into a bowl, 1 1/2 c. once-sifted pastry flour (or 1 1/2 c. once-sifted hard-wheat flour), 2 1/2 tps. Magic Baking Powder, 1/2 tsp. salt and 1/4 c. fine granulated sugar. Mix in 3/4 c. corn flakes, slightly crushed, and 1/2 c. cut-up pitted dates. Combine 1 well-beaten egg, 1/2 c. milk, 1/2 tsp. vanilla and 3 tbs. shortening, melted. Make a well in dry ingredients and add liquids; mix lightly. Turn into prepared dish. Bake in moderately hot oven, 375°, about 40 minutes. Serve warm, with pouring cream. Yield—6 servings.

Everywhere!

BRIER

Sweet as its name!

—By Chuck Thurston

Tender, Aching
Perspiring Feet

In just one minute after an application of Emerald Oil you'll get the surprise of your life. Your tired, tender, smarting, burning feet will literally jump for joy. No fuss, no trouble, you just apply a few drops of the oil over the surface of the foot night and morning, or when occasion requires. Just a little and rub it in. It's simply wonderful the way it acts on all foot misery, while for feet that sweat with an offensive odor, there's nothing better in the world. It's a splendid formula—this combination of essential oil and camphor and other antiseptics so good that thousands of bottles are sold annually to help soften up corns and callouses. Druggists everywhere.

**LITTLE NEWS ITEMS
OF LOCAL INTEREST**

—The Drumheller Health Unit will hold a Well Baby and Pre-School clinic in United Church hall on Monday, September 11, from 10 a.m. to 12 noon.

Mr. and Mrs. Dick Sherring and Miss Evone Foster motored to Calgary on Friday.

Mr. and Mrs. Dave Lewis and two children of Victoria, B.C., and Mr. and Mrs. Art Jarrett visited Wednesday of last week at the home of Mr. and Mrs. John Wood.

Mr. and Mrs. C. R. Martin and son, Norman, and Mr. J. T. Martin left Friday for Vancouver after a four-day visit at the home of Mr. and Mrs. Charlie Martin.

Mr. and Mrs. Arthur Davis and daughter of Swallow were Thursday visitors at the home of Mr. and Mrs. C. Graham.

Mr. E. Maxwell returned from Vancouver last week, where he attended the funeral of his brother, Leonard. Mr. Maxwell made the trip by plane.

The late Mr. Maxwell was a former Carbon resident and at one time operated the farm east of town now owned by John Marin.

Miss Phyllis Schuler has resigned her position in the Bank of Montreal and after a couple of weeks holiday will go to Edmonton to continue her schooling. The staff vacancy was filled by Mrs. Joe Holwegner of Carbon.

Other recent staff changes saw Mr. Hugh McKinnon of Carbon transferred to Wainwright and A. L. Heinzig of Olds take up duties here.

Mr. and Mrs. Archie McLeod and Gordon motored to Calgary on Sunday. Gordon remained in the city to attend Central High this term.

Mr. and Mrs. Alec Sobyski motored to Banff for the holiday weekend.

The Carbon ladies' softball team played the Trochu ladies at the Carbon diamond Sunday afternoon and upset the visitors by a 19-12 score.

Mrs. John Craddock and daughter, Mildred, of Calgary have been visiting relatives and friends in Carbon.

Ted Schmidt was taken to the Drumheller hospital Sunday evening and underwent an emergency appendix operation Monday morning.

Rev. Jacob G. Rott will conduct morning services at the Carbon Baptist Church and evening services at Zion Baptist Church on Sunday, September 10.

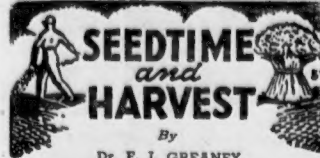

Bob Knecht was a holiday weekend visitor at Olds and Banff.

Farm Storage of Grain

Western Canada will harvest a big grain crop in 1950. This means, of course, that large quantities of grain will have to be stored on farms this fall and winter. Careful preparation should be made immediately, therefore, before the grain is harvested and stored, to see to it that farm granaries and bins are in first-class condition — rain-proof, clean, and free from accumulations of old grain and feed.

Thieves of Stored Grain. Insects, fungi (molds), and rats are the great thieves of stored grain. In Western Canada, however, the greatest dangers to stored grain are moisture and insects. Grain that is clean, dry and cool is not subject to insect damage or spoilage. To keep well, grain must be dry.

Storage Precautions. Here are some important precautions to observe in preparing farm granaries and bins for the 1950 crop. (1) Repair leaky roofs, windows and doors to exclude rain and snow. (2) Clean walls and floors thoroughly. Sweep the floor with damp sawdust, and then sprinkle a little hydrated lime over it. This should be swept around to fill all cracks. (3) Don't forget that a wooden floor, constructed so as to provide ample air space between the floor and the ground, is "Safety Item No. 1" in a farm granary. (4) If the floor is concrete, cover with moisture-proof paper. This will help to reduce possible moisture damage. (5) Don't fill the granary too full. Be sure and leave enough space between the grain and the roof to provide good ventilation.

Basic Rules. The basic rule for storing grain on the farm to prevent damage, particularly from insects, is to keep the grain cool, dry, and free of broken kernels. Carrying out this rule, and practising simple cleanliness in moving and storing grain, will go a long way toward eliminating farm storage losses in Western Canada this fall and winter. If an important grain storage problem develops on your farm this year, seek advice at once from the Stored Products Insect Laboratory, Winnipeg.

FOR SALE—One Bed, complete; 2 Dressers; Studio Couch and Chair; Buffet, Table and 6 Chairs; Rocking Chair. This furniture can be seen at the home of Mr. Ross Thorburn.
